

Swetha Pagadala – Portfolio (6 Months)

Career Objective

To contribute in a relevant role as per my skillset in handling client requirements, designing solutions, and supporting business growth. Over the last 6 months, I've moved from learning to actively contributing in presales and client engagement. I'm now confident to take ownership in solution discussions and proposal preparation. I would like to grow into a suitable role and contribute more directly to business outcomes.

Key Contributions

- **Prepared BoQ, commercials, and proposals**
- **Initiated structured templates and tracking systems** for opportunities
- **Airtel South client engagement**

Client Exposure

- Airtel South (Networking / Wireless opportunities)
- Managed follow-ups and requirement understanding

Skills

- **AWS**
 - **Compute** - EC2, Lambda, Load Balancer
 - **Networking** - VLAN, Routing, NAT/PAT, ACL, DHCP, DNS, Port Security, VPC
 - **Security** - IAM, Security Groups, NACL

- **Monitoring** - CloudWatch
- **Others** - S3, RDS
- Programming Languages - Python
- Tools - Wireshark, Draw.io, Zapier
- CI/CD Automated Deployment

Hands-On Work

- Deployed EC2 and hosted web applications
- Designed basic cloud architectures
- Performed network segmentation and routing labs

Architectures

I've worked on understanding scalable architectures like 3-tier design with load balancing and auto scaling.

AI Tools Usage

- ChatGPT – proposals & troubleshooting
- Cisco Packet Tracer, Wireshark
- Canva / Gamma – presentations
- Excel Copilot – tracking
- GitHub Copilot – scripting

Certifications

- AWS Cloud Practitioner (Completed)
- AWS Solution Architect Associate (Completed)

Value Addition

- Client Communication
- Structured workflow & accountability
- Solution-oriented thinking

Summary

Transitioned from trainee to handling real presales tasks including proposals, commercials, and client coordination. Focused on networking, SD-WAN, and AWS solutions.

Output of Tasks Done

1. Networking–AWS Mapping
2. Created a static website using EC2 Instance and GitHub.
 - GitHub Link: <https://github.com/Swetha-sys/my-app1>
 - GitHub URL for aws-web-app: <https://github.com/Swetha-sys/aws-web-app>
3. Network topologies for Networking, Wireless, AV/VC Solutions
4. AWS Tasks:
 - EC2 Running Instance State
 - Upload files to S3 Bucket
 - IAM Policies
 - Security Group Rules
 - CloudWatch Monitoring
5. Solution Architect Tasks:
 - AWS Architecture Diagrams (Draw.io)
 - Load Balancer Health Checks
 - Auto Scaling Demonstration
